Additional Notes

This area is designed for use by smaller/younger children. There are no additional risks associated with older girls using it, but it is not designed for them and priority is always given to younger girls if present.

As with all activities on site, adults should carry out a brief visual inspection of the area before the girls use it to check for unexpected branches/bags and other debris that might increase the risk to users.

This area is included on the annual RoSPA safety inspection.
